

I wish to thank you for the time to voice my opinion here concerning This Docket-RM-10803. First let me say I was in Radio back in the 70's and 80's. And it has taken a turn for the worse, In those days a station gave the news & weather every hour, and half hour, they served the local community by the way of PSA(Public Service Announcements) Fund Raisers, just general helped the community. D'J's was not required to be a button pusher. Nowadays you never hear the news or weather (never (seldom even the time. You hear the same 9 artist played on the 2 radio stations here in San Antonio, KAJA and KCYY. These 2 stations play the same artist day in and day out, If you are not Kenny Chesney, Toby Keith, Tim McGraw, Alan Jackson, Brooks & Dunn, and several others you will not hear them, Now I know the commission cannot dictate what or who a station plays or their format to a point, But I think the commission should look into the fact that these 8-10 major artist are signed on with major labels with deep pockets. I feel the commission has allowed major corporations to take over the media and airways and forced the little man out of the business. Hold these stations accountable. Implement rules to make these stations have to staff their stations locally with personal. Hold them accountable and go back to the rule that you can only own so many stations within a standard mile radius. Investigate these connections between radio and major labels.
